PRIVATE HOUSE BUILDING

Construction company "Veles" deals with construction on a turnkey basis with large spectrum of construction materials, in Kazan, Tatarstan Republic and other regions of Russian Federation:

Wooden houses:

- Log houses and glulam houses – pine wood, Siberian larch, cedar
- Canadian technology houses (frame houses)
- Finnish glulam and rounded log produced by Honkamajat Company (one of three best companies in Finland).

Construction supervision by specialists from Finland.

Stone houses:

- Brick
- Gas concrete (foam concrete)
- Claydit block
- Porotherm

Ancestral estate and mansion houses

Our team consists of highly qualified competent specialists; that's why we are able to guaranty accurate implementation of the construction technologies with different materials.

All the houses performed by us are made of environmentally friendly materials and correspond to the valid quality standards.

FINNISH GLULAM

Veles Company is official distributor of Finnish Company Honkamajat and it produces the construction of Finnish houses in Kazan and regions of Russia.

A Honkamajat house is not only a masterpiece but an input into family and life harmony.

One of the reasons for this is the fact that log is the most natural construction material, the strength of which is verified by nature. The nature itself tested the log qualities by the severe Scandinavian climate and saturated the log with useful peculiarities that are of highest importance for health.

Each future owner is invited to Finland to visit the one forest from which his house will be constructed and to watch the process how this finest wood is converted into highly-qualified log.

By combining hi-tech European production, experience and qualitative material the houses of Honkamajat make a symbol of premium position and quality.

Honkamajat Production line allows production of logs with different variants of connections.

This equipment provides the possibility to create contemporary corner connection and connection of 'dovetail' type, that makes a unique image of house.

THE COMPANY "HONKAMAJAT FINLAND LTD" WAS FOUNDED IN 1963.

The office and basic production of company are located in Oulu city in the North of Finland.

- ✓ The list of clients in more than 30 countries in the world
- ✓ Capacity of production up to 800 house units per year
- ✓ 95 percent of product for export
- ✓ Help the clients to realize their dream of ecological and healthy accommodation of highest quality in different parts of the world
- ✓ Portfolio of products includes houses of private and commercial use – sanatoriums, hotels, cottages for tourists base, saunas, cottages and etc.

- ✓ Ultramodern automatic line
- ✓ 60 different profiles of material with thickness from 70 mm to 240 mm
- ✓ Compact system "Tiivishirsi" warrants the maximum compact butting of the log walls and the corners between them.
- ✓ Main advantages of the company are the excellent product quality and the prompt delivery.

VELES COMPANY OFFERS THE PROJECT DEVELOPMENT SERVICE AND LOOKS FOR THE PARTNERS TO EXECUTE THE PROJECTS:

- Veles Company serves as Managing Partner (MP) of the Project, the main function of which is development and management of immovable property;
- MP deals with creation and realization of Project;
- MP independently makes a decision upon basic conception of Project Development, terms of realization, financing methods, costs and peculiarities of object sales;
- Quarterly Managing Partner composes Project Development Plan, and prepares the report of completed tasks;
- On receiving the positive result from Project Realization the distribution of finances between the Owner and the Managing Partner takes place, which is regulated by mutual agreement of the Parts.

Development of Projects is possible in Tatarstan Republic and other regions of Russian Federation (object area not less than 50 000 m²). Meanwhile, commercial buildings are regarded as well as different objects of domestic buildings. The large part of gained experience is related with creation and realization of country estates projects.

We invite the investors and estates owners for an open dialogue!
